

To Our Valued Friends and Customers,

I wanted to give you all an update on our operating status as it stands today, March 30, 2020.

We continue to monitor the rapidly developing news and shutdowns across the country. As a company and family, we are committed to adhering to all health and safety recommendations issued by our local, state and federal government. Consistent with our designation as a company engaged in the manufacture of equipment and other infrastructure necessary to agricultural production and distribution we want to assure you we are hard at work to keep your location stocked.

We are temporarily suspending all sales calls and outside visitors through at least April 30, 2020 in an effort to halt unnecessary exposure. For those customers who wish to pick up your orders, we ask that you kindly call before arrival and allow us to meet you in the parking lot on the northeast side of our facility.

We have not experienced any delays in our supply chain to date and remain confident in our ability to acquire necessary materials for any job.

As always, we appreciate our customers and the faith you place in us. It is our hope that you and your families are all safe and healthy and the impact of these events is minimal. I look forward to brighter days for us all and the opportunity to share a laugh and hug or handshake soon.

Please feel free to contact me with any questions or concerns you may have.

On behalf of Jim, Edie, Phil and our entire crew we thank you.
